

The book uses a driving theme to explain how entrepreneurs and professionals can be successful by taking different paths in their professional lives.

*Driving to Success* addresses the question, "What do you want to be when you grow up?" by letting readers know that it shouldn't be a one-word answer that you have to figure out in your twenties. Johnson notes, "After taking many paths in my professional life, I thought it was time to share my journey and provide some practical spiritual advice."

Each person is their own vehicle. Leila discusses how your path can take a different turn whether your Personality or Spirit is driving.
